Forecast for Thursday 10 Nov 2022

Weather: Mainly cloudy with patchy rain or drizzle, this most persistent across western and southern areas with some brighter interludes possible in the east.

Chance of cloud-free hill tops above 600m: 20%

Low cloud and visibility: Good visibility beneath cloud, but moderate or poor in rain and very poor in generally extensive cloud above 500m, though 400m at times in rain, especially in west.

300	11/8	11/9	12/9	12/9	12/9	12/9	12/8	12/9	12/9
Valley	11/9	12/10	12/10	13/10	13/10	13/10	12/10	12/10	13/10
Freezing Level*	2200m	1900m	1900m	2100m	2200m	2200m	2400m	2400m	2500m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Mild, even on the tops despite gusty and buffeting winds and quite damp at lower levels, so rather uncomfortable walking with thicker windproof layers. Low level temperatures could reach 16 Celsius in any brighter spells.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Wed 09 Nov 2022	28.6mm	47.2mm	75mm

Forecast for Friday 11 Nov 2022

Weather: Very mild, but another rather windy and cloudy day with patchy rain and drizzle and areas of low cloud, but cloud tops likely to lower so that some of the summits will be out of cloud.

Maximum wind: Southwest 30 gusts 45mph, but 45-50 gusts 60mph on the higher slopes for most of the day.

Chance of cloud-free hill tops above 600m: 30%

Low cloud and visibility: Very poor in mostly extensive cloud down to 450m, but occasionally broken or perhaps scattered in east and cloud top lowering to around 700m so some of the tops will be free of cloud. Otherwise good visibility but poor at times in rain and drizzle.

Temperature: **Valleys:** 13 or 14 C, but 18 C is possible in any breaks in cloud.
At 600m: 10 C
Freezing level: Well above summits
